- Conception of LTSA interface
- Conception of performance guarantees
- On-site support during contract negotiation

Project description

We were appointed by the O&M service provider in Egypt, to provide independent technical advice during proposal and contract negotiation for an O&M power plant service contract.

Our role included assisting the client in preparing proposal documents – especially the entire O&M concept, assessing plant design and operability documents for calculating associated O&M risks. We prepared operation cost estimates for all O&M activities, provided staff plans and highlighted O&M tasks associated with commissioning activities.

Our careful and professional O&M advice helped our customer to prepare a world class O&M concept.
